GOLD EXPLORATION
in Cortez, Nevada

AMERICAN EAGLE GOLD

November Corporate Presentation

AE TSXV

Forward Looking Statements

WE ARE IN THE MINERAL EXPLORATION AND DEVELOPMENT BUSINESS. IT IS INHERENTLY RISKY, AND ALL INVESTORS SHOULD BE KEENLY AWARE OF THIS

This presentation contains forward-looking statements. All statements, other than of historical fact, that address activities, events or developments that American Eagle Gold Inc. believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding the estimation of mineral resources, exploration results, potential mineralization, potential mineral resources and mineral reserves) are forward-looking statements. Forward-looking statements are generally identifiable by use of the words “may”, “will”, “should”, “continue”, “expect”, “anticipate”, “estimate”, “believe”, “intend”, “plan” or “project” or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond American Eagle Gold Inc.’s ability to control or predict, that may cause the actual results of the project to differ materially from those discussed in the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things, without limitation, failure to establish estimated mineral resources, the possibility that future exploration results will not be consistent with American Eagle Gold Inc.’s expectations, changes in world gold markets and other risks disclosed to the Canadian provincial securities regulatory authorities. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, American Eagle Gold Inc. disclaims any intent or obligation to update any forward-looking statement.

CAUTIONARY STATEMENT REGARDING HISTORICAL RESOURCES

The reader is cautioned that American Eagle Gold Inc. has not undertaken any independent investigation of the dimensions, quantity or grade of the mineralization referred to above, therefore this historical data should not be relied upon. American Eagle Gold Inc. views this historical data as a conceptual indication of the potential size and grade of deposits in the area, and this data is relevant to ongoing exploration efforts. In view of when the resources were estimated and the differences in metal price and operating costs prevailing at the time compared to today.

American Eagle Gold Inc. does not consider the resources to be compliant with respect to requirements of NI43-101. American Eagle Gold Inc. does not treat any of the historical resources as Current mineral resources or mineral reserves .

The technical information contained in this American Eagle Gold Inc Presentation has been reviewed and approved by Charles Beaudry, P.Geo, Director of American Eagle Gold Inc, who is a Qualified Person as defined in "National Instrument 43-101, Standards of Disclosure for Mineral Projects." All currency numbers are in \$CAD unless otherwise stated.

*Note on Conceptual Exploration Targets: The potential tonnage and grade of these targets are conceptual in nature. There has been insufficient exploration to define them as mineral resources and it is uncertain if further exploration will result in the targets being delineated as mineral resources. American Eagle Gold Inc only considers these targets to be an indication of the presence of mineralization on the property and of the potential of property to host an economic deposit at this time. American Eagle Gold Inc advises that no one should consider these targets as mineral resources.

American Eagle Gold: Part of ORE GROUP

Ore Group consists of in-house technical and financial expertise & is focused on premier jurisdictions & on metals with strong, long-term fundamentals

Metal Energy

MERG: TSXV (IPO set for Q3 2021)

Nickel exploration, discovery & development

BASELOAD ENERGY

FIND: TSXV

10X RETURN

since spin-out in 2020

MISTANGO RIVER

MIS: CSE

~10X RETURN post gaining control in Oct-2019

Backed by strategic investor
Kirkland Lake Gold & Eric Sprott

AMERICAN EAGLE GOLD

AE: TSXV

Brand new **Nevada focused gold** exploration within the Cortez Trend

QC COPPER & GOLD

QCCU: TSXV

Quebec focused developer of the Opemiska Mine in Chibougamau, QC
6X RETURN in 2020

IN 2020

American Eagle Gold **CORPORATE OVERVIEW**

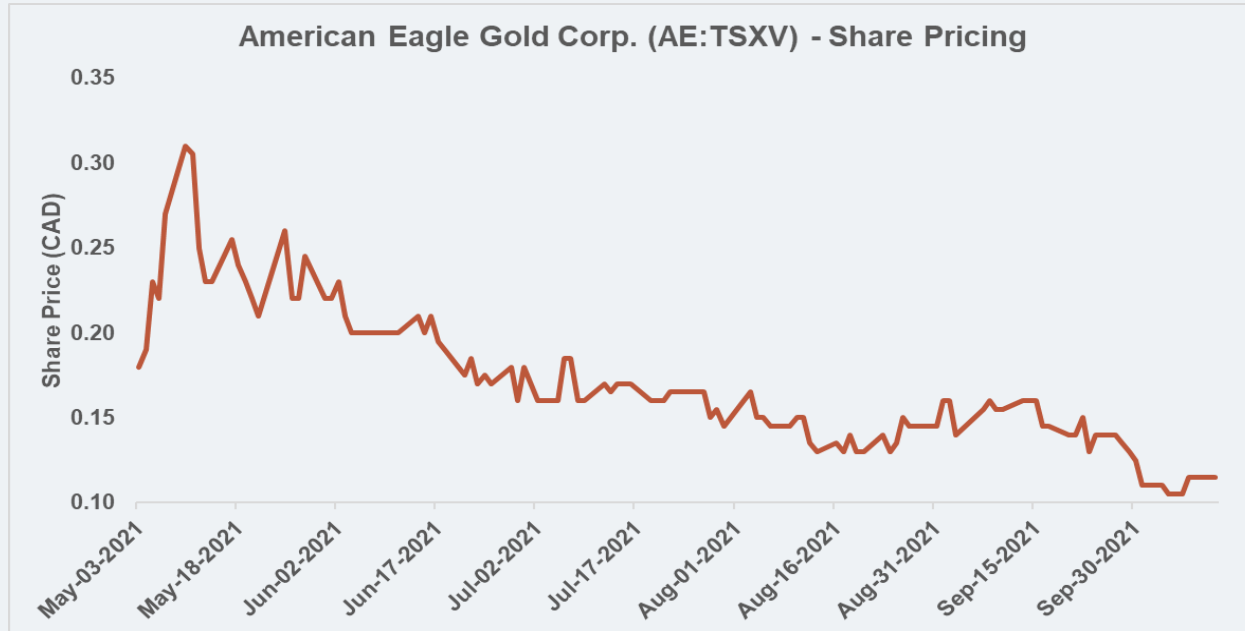

Key Metrics

TSX Venture Exchange	AE:TSXV
Shares Outstanding	56.76M
Warrants and Options	14.9M
Share Price (09/11/2021)	\$0.125
Basic Market Capitalization	\$7.1M
Cash and Marketable Securities	\$2.7M
Management, Insider and Inst. Ownership	43%

Management and Board

Anthony Moreau	CEO & Director
Mark Bradley	VP of Exploration
Stephen Stewart	Chairman
Alex Stewart	Director
Tim Gallagher	Director
David Shaddrick	Director
Kurt Breede	Director

Share Price – AE: TSXV

Golden Gate property on the Cortez Trend in Nevada

About AMERICAN EAGLE GOLD

Flagship asset is Golden Gate

– adjacent to Barrick's 15Moz Goldrush Deposit

Targeting a
high grade, tier 1,
deposit on the Cortez Trend

Golden Gate is the amongst
the last underexplored
property in the Cortez
Trend

Nevada, USA

Exploration Team has a track record of discoveries in the region

Fully Funded for 2021 drill campaign

Drilling scheduled for
November

Location | **People** | **Drilling**

Nevada | World Class Mining Jurisdiction

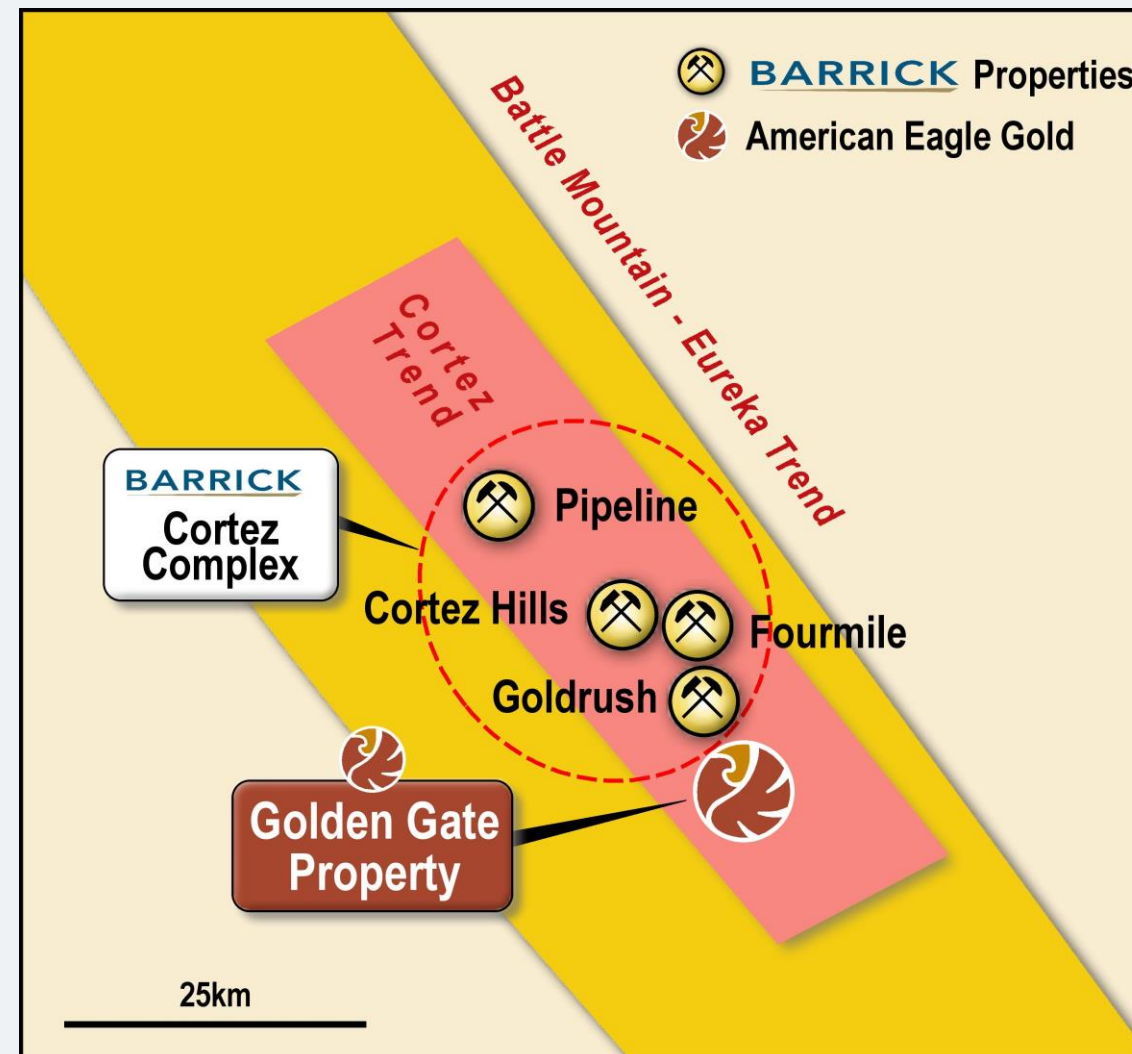

- Fraser Institute's [#1 Mining Jurisdiction](#)
- Home to Barrick & Newmont
- Nevada Annual Gold production: 7.1Moz over last 25 years
- Ultra high-grade underground mines
- Large open pit 'Carlin-type' deposits
- Quick permitting processes
- Excellent access & mining infrastructure
- Strong mining workforce

 **BARRICK** properties
 **American Eagle Gold**

About THE GOLDEN GATE PROJECT

- **Carlin-style gold prospect**
 - Large, underground gold system hosted in lower plate rocks
- **On trend with Barrick's Gold Rush and Cortez Hills Deposits**
- Adjacent to Barrick Gold's **Cortez Complex**
- Cortez Complex's **three major deposits with > 10Moz**
 - Pipeline (1991)
 - Cortez Hills (2002)
 - Goldrush (2011)
- Golden Gate is **7,574 acres comprised of 111 claims** with road access

Differentiating Factor #1: Along Trend of Four Tier 1 Deposits Next Door

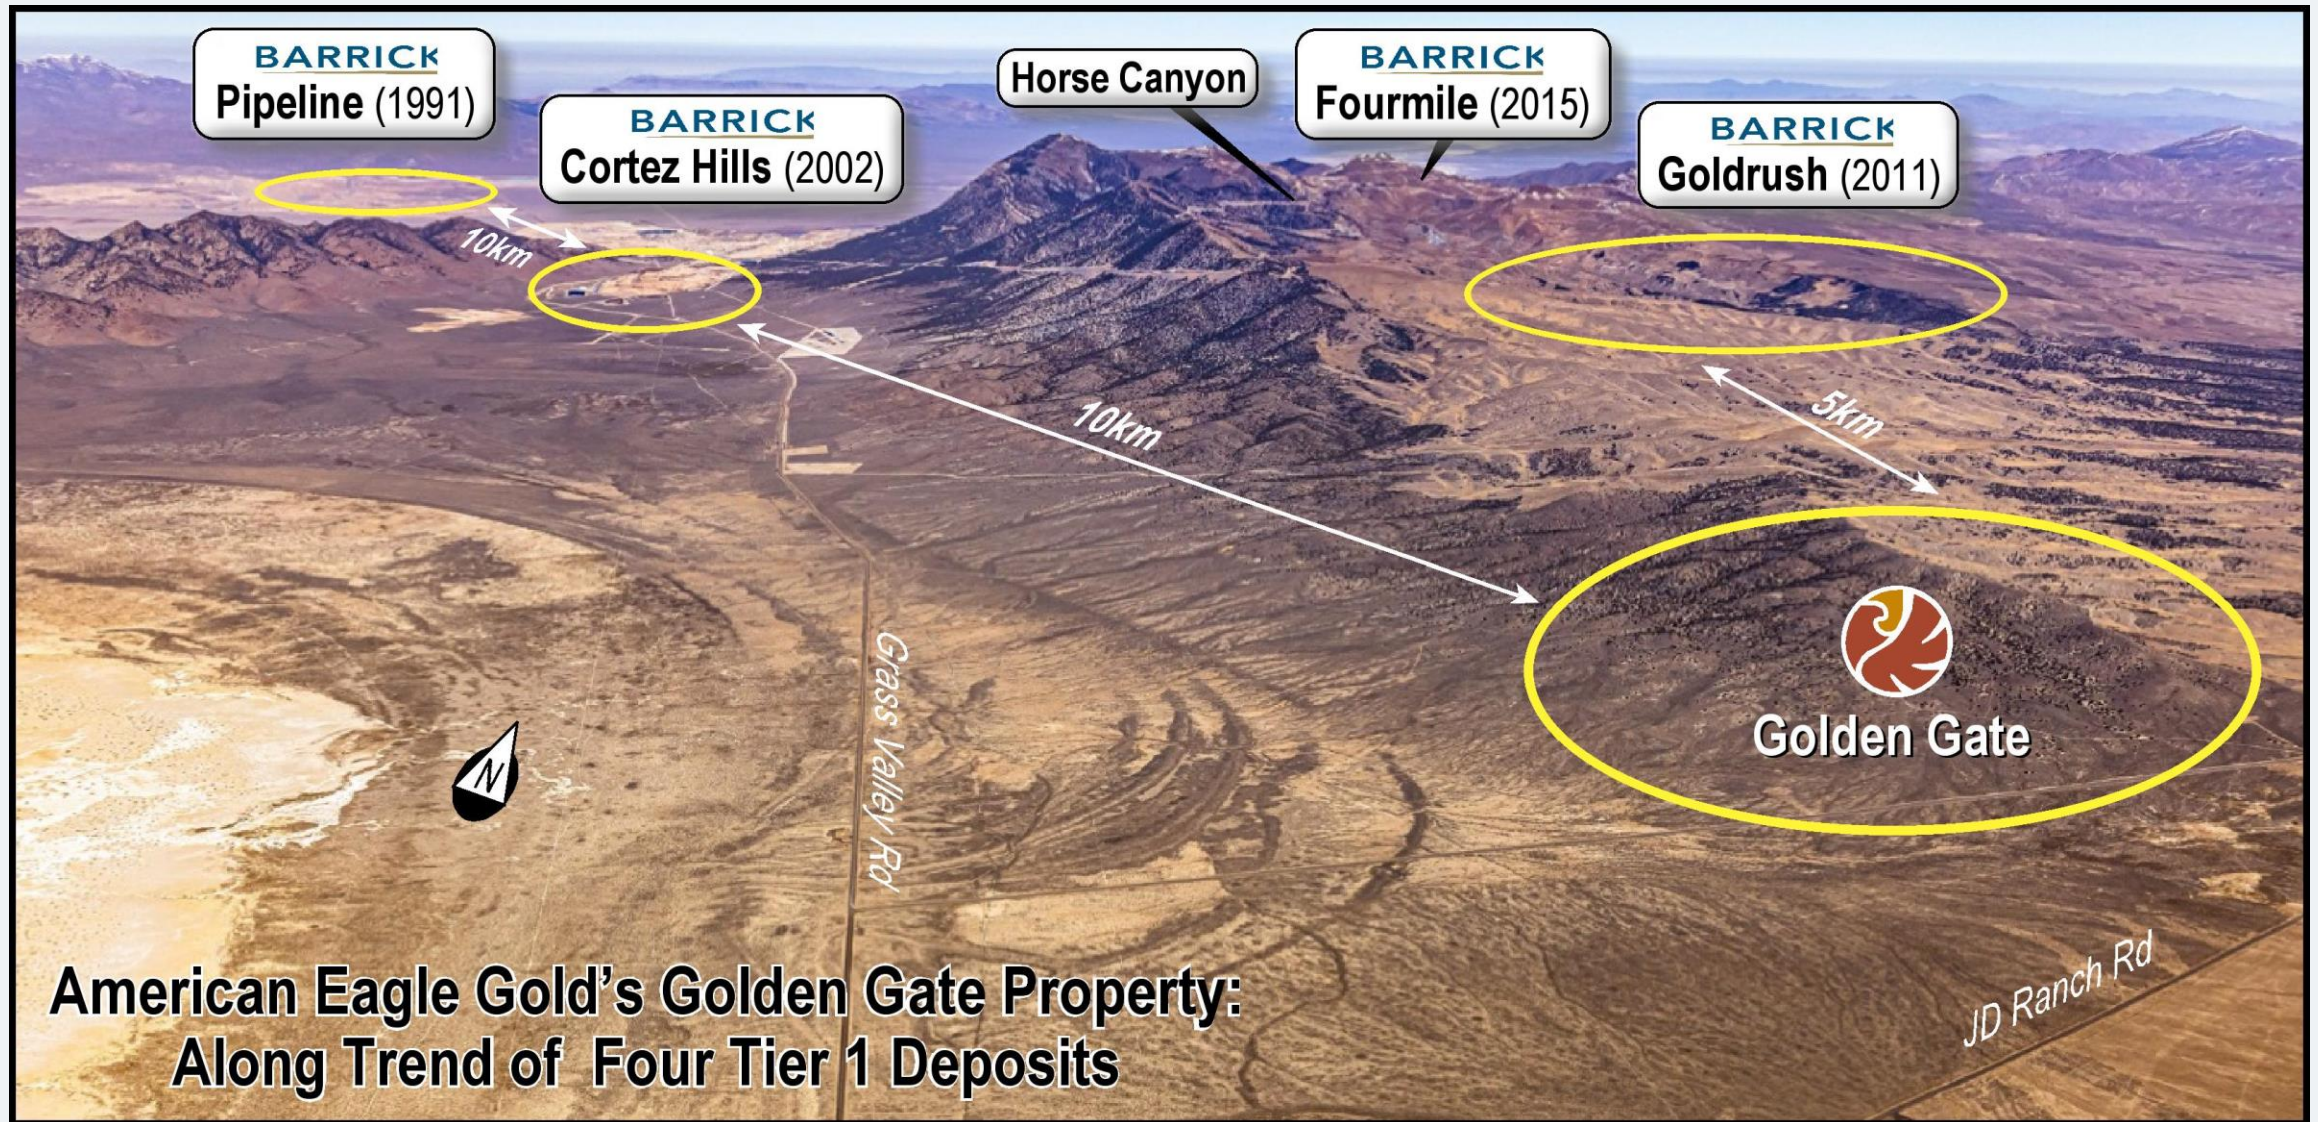

CORTEZ HILLS

- Tier 1 Asset
- Discovered in 2002
- 15 million ounces @ 4.1g/t Au
- 799K ounces of gold produced in 2020
- 10km North of Golden Gate

GOLDRUSH

- Tier 1 Asset
- Discovered in 2011
- 2021 Commencing Commercial Production
- 14.9 million ounces @ 9.4g/t Au
- 11/06/20: FM20-169D drill hole yielded 9.6m @ 80.1g/t
- 5km North of Golden Gate

Golden Gate: The Next Great Cortez Discovery?

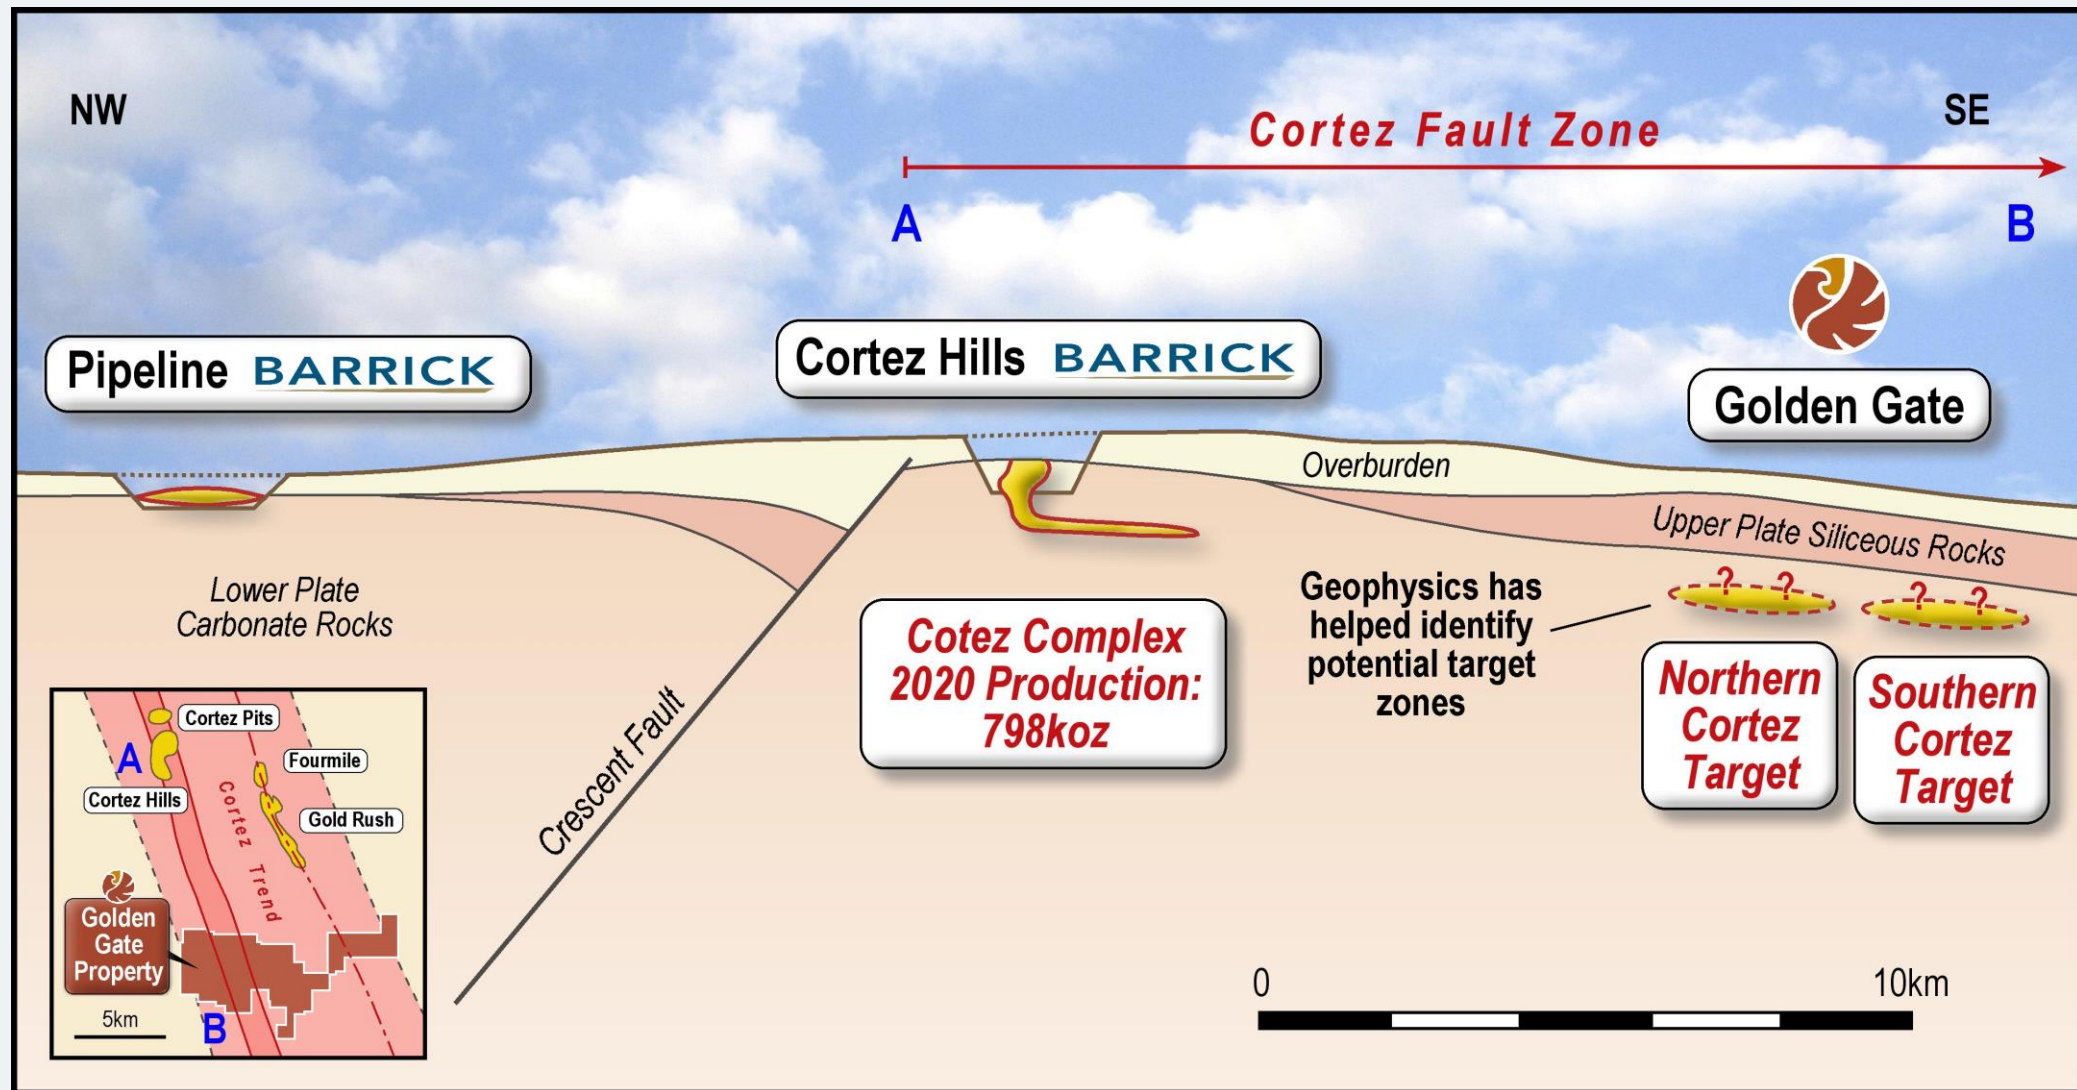

Project History | ENORMOUS EXPLORATION POTENTIAL AT DEPTH

- Property has **not been properly explored since the discovery of Gold Rush**
- **Gold Rush Discovery in 2011** has increased understanding of underground geology in the area.
- Previous owners lacked the budget and expertise
- Few historical drill holes into lower plate
- Majority of exploration was in search of near surface deposit using surveys, trenching, shallow holes
- **Large underground deposit** is believed to be underground, in the lower plate rocks

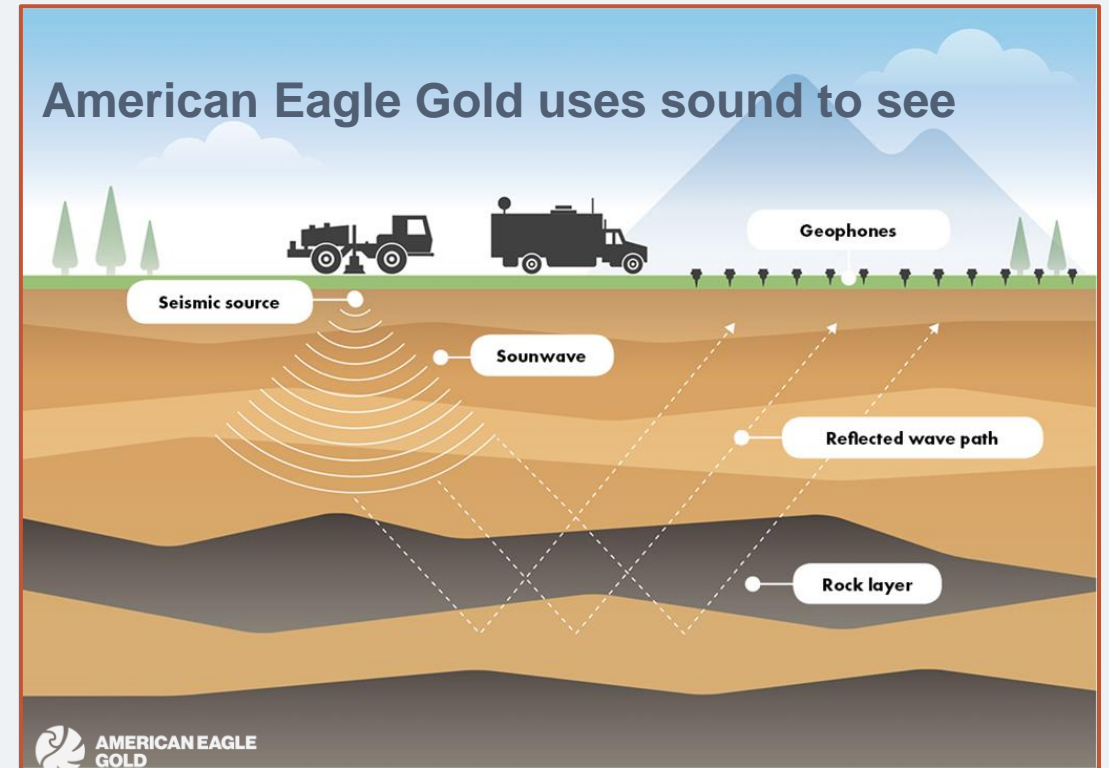

Cortez Fault Zone LONG SECTION | Golden Gate Drill Targets

April – August Field Exploration Work

- Field exploration program utilized surface geology/geochemistry and geophysical data
- Geochemistry used to measure the concentration of elements contained in the ground
- Geophysical Surveys help geologists create an underground map of the ground
- CSAMT and Seismic provide information to find the best drill targets
- CSAMT shows the type of rocks underground
 - scans frequencies in the ground
- Seismic shows the structure of the rocks
 - Uses sound imaging to take an X-Ray of the ground

Onshore seismic surveys use specialised trucks that carry a heavy plate that is vibrated to generate a seismic signal and a series of geophones laid out on the ground to record the returning sound waves for later analysis.

2021 GOLDEN GATE EXPLORATION PLAN | DRILLING IN November

Differentiating Factor #2: The Exploration Geologist

Mark Bradley, B.Sc., M.Sc., P.Geo., V.P. Exploration

- 35 years of experience in the mining sector
- Cortez project team leader during Barrick's discovery of Goldrush, then chief exploration geologist at Cortez
- World expert in Carlin Type Deposits
- PDAC's 2014 winner of Thayer Lindsley Award for International Mineral Discoveries

Golden Gate Target Drill Target Zones | On Trend with Cortez Hills

- Field exploration program utilized surface geology/geochemistry and geophysical data
- Initial program will focus on two main areas of interest: Northern Cortez and Southern Cortez Target
- Drilling will test lower-plate carbonate rocks adjacent to the Cortez Fault zone in search for an orebody similar to Goldrush and Cortez Hills
- Next round of drilling will be on Red Hill Anticline and other targets on Cortez Fault Zone

Southern Cortez Target - CSAMT Results

Sizable and 'rooted' untested drill target shows high resistivity characteristic of lower plate carbonate rocks. These are the same rocks that host Barrick's Goldrush and Cortez Hills deposits next-door.

CSAMT survey suggests that some of the deformation seen in seismic data may impact lower-plate rocks

Fall Drill Campaign | On Schedule to Begin in the Fall

- Exploration will focus on intersecting lower plate rocks, structures and alteration indicating the presence of a Carlin-type system
- Initial drill program 3-4 holes totaling ~3,000m in drilling
- Notice of intent was filed on August 17th
- **Permit Approval received in mid September**
- **Major Drilling hired as drill contractor**
- Earthworks and drill pad construction underway
- **Drilling scheduled to begin on Monday, November 29th.**
- Developing a plan to expand drill campaign on the Cortez Fault Zone and Red Hill Anticline

Why Invest in AE | LOCATION, PEOPLE, DRILLING

- World Class property location **attached** and on **trend** to Barrick's future Nevada growth pipeline
- American Eagle Gold has the knowledgebase and experience to find the next Goldrush deposit.
 - Employ world the world renowned expert in **underground Carlin-Type deposits**, Mark Bradley

Upcoming Catalysts

- **Drilling in November**
- Commencing robust marketing campaign.
 - American Eagle Gold will not be the best kept secret in Nevada for long
